

PRESS RELEASE

TTC Win Innovation Award for Truckminder® Anti-theft System

TTC, the UK's leading aftermarket supplier for Commercial Vehicle components and part of the Unipart Group, is delighted to have been presented with the Award for Innovation at this year's AutoTrade Expo in Dublin.

The Truckminder® system, with its patented technology, will protect your fuel tank, catalytic converter/DPF, ECU and battery by alerting you via GSM pager or by connecting with existing Telematics when interference is detected.

TTC are exclusive distributors of the Truckminder® system and have been actively demonstrating this leading edge technology at a number of events this year, including the CV Show, Automechanika and the Melbourne Truck Show, to name but a few.

AutoTrade Expo, which was held this weekend at the Citywest Conference Centre in Dublin, was the first of its kind ever held in Ireland and showcased all aspects of the Irish Auto Aftermarket in a major trade only event.

This latest award win reinforces TTC's commitment to innovation and supporting new technology that its customers can benefit from. Darren Miller, Commercial Director at TTC says;

“At TTC we pride ourselves in being innovators and leading the way in the CV aftermarket, Truckminder® is a perfect example of a new technology that will, in the long term, save our customers and also their customers, time and money, by illuminating the worry of fuel theft, etc, which is still very prominent. We are delighted to have been acknowledged in this way by AutoTrade Expo”.

“
